WASHINGTON, May 12.—So comprehensively laid were the plans of the War Department yesterday, even before the passage of the joint resolution providing for the relief of the volcano sufferers, that there was really very little remaining for the officials to do today.  
The plans of the Commissary Department, made after careful consideration of the news dispatches from the Antilles, contemplate the supply of 4,000 ration for four days. The Quartermaster's Department is purchasing clothing supplies for 40,000 people and the Medical Department is working in proportion in its purchases.  
In the Navy Department the carefully planned relief measures were being carried forward systematically and rapidly. The Buffalo has been ordered to be put in readiness for immediate use as a food and supply transport in case it should be decided to send more supplies than the Dixie will carry. Action has not yet been taken upon Admiral Bradford's suggestion that the equipment of the USS. Marquette to relieve the pressing need for fresh water. The Admiral is anticipated to accept the plan and has accordingly telegraphed to Pensacola and Norfolk to have the tenders at those ports ready to receive the USS. Marquette. The Admiral also has tendered the use of his fleet of transports, which he is the head, has a small but efficient crew of sailors and marines. The Admiral has suggested to Secretary Moody that these ships be valuable by their capacity to carry supplies, especially adapted to relief work. Each of the ships carries from two to three thousand tons of cargo.
